

SISTEMA ARMADI ANTE BATTENTI

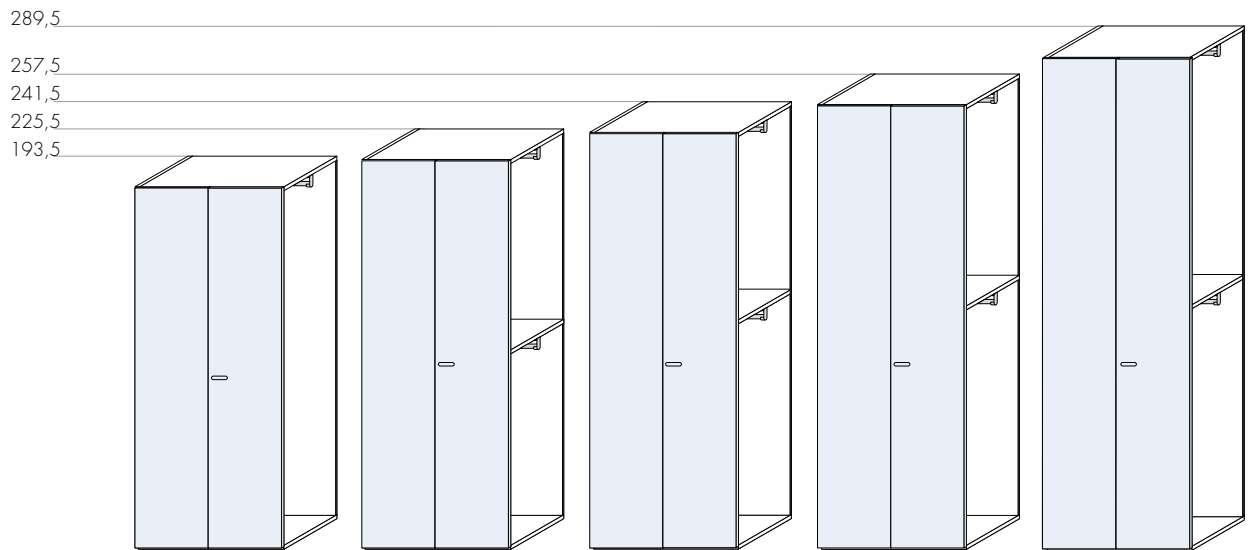

Il programma a contenitori modulari con anta battente consente una progettazione concreta e si integra perfettamente con le diverse collezioni: i vari moduli creano soluzioni di contenimento specializzate come armadi a ponti lineari, armadi a ponte ad angolo, cabine angolari e cabine armadio lineari, oltre a un programma di armadiature dalla modularità estesa. Il sistema consente di realizzare armadi su misura, mansardati e non: soluzioni che si integrano perfettamente con le vostre esigenze estetiche ed architettoniche. Gli interni, personalizzabili a piacere con accessori funzionali come cassettiere, ripiani, tubi appendiabiti, servetti estraibili, luci a led con sensore, sono adatti anche alle mani dei più piccoli, che possono utilizzarli in tutta sicurezza. Completano la personalizzazione le fantasiose maniglie, coordinabili per forma e colori.
